

Citrix with Windows Virtual Desktop

Deliver the best virtual desktop
experience for cloud and on-premises.

Let's talk about Citrix and Microsoft Windows Virtual Desktop.

Citrix, a worldwide leader in desktop virtualization, is officially authorized by Microsoft to bring the benefits of Windows Virtual Desktop to you.

Windows Virtual Desktop (WVD), what's that?

An Azure-native remote desktop and application virtualization service.

INCLUDED WITH

Microsoft 365 E3+
OR WINDOWS E3 SKUS

Windows 10
MULTI-SESSION OS

Microsoft Azure
ONLY, NOT FOR ON-PREMISES

Windows 7
EXTENDED SUPPORT

"But I'm not ready for cloud-everything."

Moving to cloud is a series of steps, not a giant leap.

That's where Citrix Virtual Apps and Desktops helps.

Citrix Virtual Apps and Desktops (CVAD) lets you **manage on-premises and cloud** virtual apps and desktops. It's the best way to **manage WVD in a hybrid cloud**.

- Transition to Azure at your pace
- Maximize on-premises investments and skillsets
- Maintain compliance and business requirements
- Use one tool for cloud and on-premises management

Tell me more!

When you combine the power of Citrix with WVD, you achieve amazing things.

Step into hybrid cloud.

Citrix lowers your **time to value** by making it **faster and easier** to manage existing on-premises production apps and desktops alongside new Azure deployments. The Citrix tools you already know and love, lets you **centrally manage images** across on-premises and Azure deployments, **streamlining lifecycle management**.

Give people an experience they want.

Eliminate barriers to adoption by giving people a no compromise **intelligent workspace** experience with **Citrix Workspace app**. The blazing fast, high-definition Citrix HDX experience lets you run even the most demanding apps like 3D, CAD, and streaming video on the **device of your choice**.

Modernize IT monitoring and control.

Go beyond binary on/off access policies, with a **real-time policy engine** that adapts to user identity, location, device, and security postures. Continuous **monitoring and real-time analytics** trigger automated steps to adapt to changing security and performance conditions across Azure and on-premises.

Turbo-charge Microsoft Teams and Office 365.

Say goodbye to choppy video and bad audio. Citrix ensures virtualized **Teams and Skype for Business** sessions always have **high-fidelity video and crystal-clear voice** from any location – even bandwidth-constrained branches and field locations. Plus, Outlook, OneDrive, and Office 365 apps perform flawlessly, and data always stays synchronized.

A joint solution for today, tomorrow, and beyond.

➤ Simple

Reduce time to value by leveraging Citrix deployment tools to get up and running right away.

➤ Flexible

Superior management, monitoring, and provisioning tools make managing WVD a breeze.

Citrix Virtual Apps and Desktops

Windows Virtual Desktop

➤ Comprehensive

The most all-inclusive way to intelligently transform into a digital workplace.

➤ Hybrid

The best way to centrally manage your on-premises and new Azure desktops.
